

x-axis is technically concentration for blue/light gray traces
x-axis is read # for green/darker gray traces

Fluorescence Single Well vs Spectra

Log Fluorescence Units (max 14,000 rfu)

Read #

Log Fluorescence Units (max 14,000 rfu)

Fluorescence Spectra Reads at Ex 280nm

Read #

Absorbance Units

Absorbance Reads at 280 nm (Single wv)

Concentration (M)
